Daylight Saving Suspended for 2022: May still affect device time

In accordance with government advisory, Daylight Saving Time implementation has been suspended for this year.

It is important to note that, due to previous year's DST software patches that may still be active on your devices, including phones, tablets, and laptops, this Sunday's time may still move forward by an hour.

As a proactive measure, Vodafone is informing its customers that due to DST reflection there may be possible changes in device(s) time. Users can disable the "automatic" time setting mode to prevent the device time from moving forward by one hour on Sunday 13th November at 2am.

The time displayed on the device clock is controlled by proprietary software of the device manufacturer. If you are not sure of the time on your device, you may check the correct time by dialling 124*1*7# for Vodafone prepaid or 125*1*5# for postpaid or call Vodafone Call Centre on 124 (free) or 123 (charged) line for confirmation of the correct time.
