

We now have new ways to help protect our smart devices and have online privacy.

The Norton Security solution is a user-friendly system that covers the security needs of our employee devices.

Rotomould Group is a multi-national company whose core business is manufacturing polyethylene products, predominantly water tanks under the brand name of Rota Tanks using rotational moulding technology. Our Offices are located in the Solomons, Kiribati, Vanuatu, Samoa and Tonga. Given our dispersed workforce, the centralised security management portal provided by Vodafone and Norton, gives us the peace of mind in remotely managing security licenses across multiple devices at various regional offices. The anti-virus software is much faster and secure when compared to our previous security solution.

We thank Vodafone for their comprehensive and on-going customer service.

Kashneel Chand,
Group Manager, Finance & Risk Management
Rotomould Group of Companies
