Since day one, we set out to do law differently. Our mission has always been Solutions Oriented, Results Driven.

Whatever the problem, we provide the solution and generate a result.

And this isn't just in the courtroom. We aim to provide our clients with the best possible legal services across all aspects of their interaction with us.

In line with this mission, we are constantly looking for new digital solutions to drive our business and client experience.

For these reasons, on boarding with Vodafone's M-PAiSA platform made perfect sense for us. It provides each of our three branches with greater flexibility and our clients with greater convenience and choice when making payments.

Also, with the current pandemic, the M-PAiSA platform has helped reduce direct contact between our team and clients, helping us maintain COVID safety protocols and keeping our staff and clients safe.
