Digital Transformation Is Reshaping The Enterprise Network

Predictable Connectivity is at the core of any transformation

Mission-critical applications are moving to the **cloud**

Businesses continue to diversify and **expand**

The network is critical to deliver the user and application **experience**

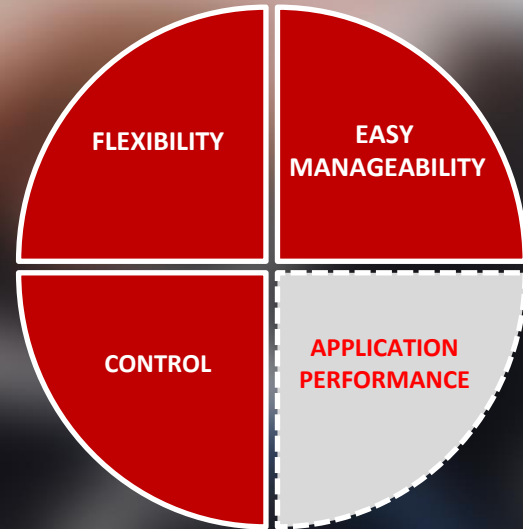

Vodafone SD-WAN Overview

High-speed networks and guaranteed data connectivity are essential when it comes to business

The move to cloud, coupled with increased use of bandwidth-heavy, SaaS-based applications like Office 365, Salesforce, AWS and Azure Cloud has led to accelerated growth in enterprise WAN traffic over recent years. To succeed in a fast-moving market, businesses need faster, more secure connectivity, as well as better visibility and control of the applications going across their network.

Vodafone SD-WAN is a Software-Defined Wide Area Network (SD-WAN) that allows you to reliably connect branches and cloud services. By integrating the latest Vodafone SD-WAN with our fixed and mobile networks, Vodafone SD-WAN solution backed by SLAs and application policies which are controlled through our centralised portal.

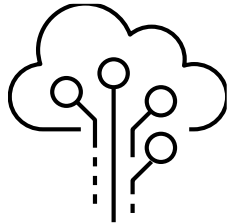

WHY Vodafone's SD-WAN Solution for your Business?
