

Now you can work from anywhere

REMOTE WORKING SOLUTIONS

Help your people work efficiently,
wherever they are.

Recommendations

For Employers

Equip your users to have tools such as Laptops, Mobile phones and Internet access to work from home

Train and educate your users on how to remotely access your company's servers, applications, files and data

Re-iterate company policies on Information Security aspects

Create VPN access for users to access critical services

Create and circulate working procedures to work from home

Provide collaboration and presence tools to conduct online meetings

For Workers

Adhere to procedures set out by your organization to work from home

Inline with your company policies, you may explore video calling and conferencing applications such as WhatsApp, Google Hangouts, Skype and Zoom.

Mobile Internet Sharing

Share your mobile data to your laptop

Mobile Internet Sharing

If you already have a Data Plan on your Mobile, you can share it to your device and laptops using Mobile hotspot and Tethering feature. The Data can be shared to multiple devices using a personal area connection.

To use this feature from your device, follow the steps in the links below.

For Samsung Devices

<https://www.samsung.com/us/support/answer/ANS00079036/>

For Apple iPhone devices

<https://support.apple.com/en-us/HT204023>

If you need to subscribe/activate Mobile Data plans, refer to the plans that are listed in the below link:

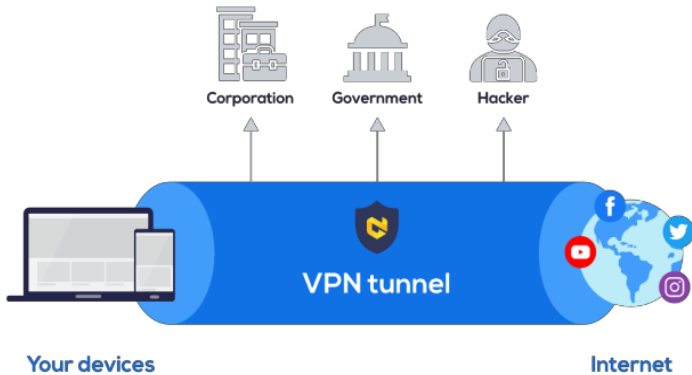

<https://www.vodafone.com.fj/business/products-services/mobile-office/smart-bundle-plans>

For more information call customer care on 123 (charged) or 124 (free) or email at info@vodafone.com.fj or contact your account manager.

VPN/APN Access

To provide secure access to your Company Servers, Applications and Data

VPN (Virtual Private Network)

VPN allows remote users to connect their devices and laptops to the work applications, work emails and files securely over the internet. We provide end to end secure tunnel between the user's device to your corporate servers so that your communication is not compromised.

Private APN (Private Access Point Name)

Vodafone also provides private secure APN solution to allow customers to communicate and send data from a remote location to another.

Most banks in Fiji use this solution to send their EFTPOS transactions over the Mobile Network. All communications is encrypted end to end using industry grade encryption tools.
