

Transfer Data Securely and with Confidence

Wide Area Networking Solutions.

Vodafone's highly available MPLS Network provides reliable and secure connections to many Fijian businesses. Keep your branch and remote offices connected to the head office with our dedicated WAN connections, supported and backed by service level agreements and engineering support. Extend your LAN, share applications, run your ERP, POS, transactions, send emails, browse the web, use VOIP and many more. Simple yet effective. Give your business the boost it needs.
